General Comment

Please consider the long term ramifications of using Round Up & other toxic chemicals used on our food & in our environment. I've know 5 people who have died of cancer within the last 2 yrs, none of which had a history of cancer in their family & none of them smoked. The common denominator that I could uncover 1) they ate conventional food (sprayed with round up...as most is) & they used these types of chemicals on their lawns. Let's take a "Better safe than sorry stance" instead of "innocent until proven guilty" stance for once.
